National Startup Competition 2022
Thank you for joining us today to celebrate university entrepreneurship and the best university startups in Denmark. You can look forward to hearing the five finalist startups, one from each category, live-pitch on stage, all hoping to be announced the overall winner of the National Startup Competition 2022.

Today is also a celebration of a resilient ecosystem and inspiring individuals. Traversing the Covid period has proven not only the resilience of the Danish startups and ecosystem, it has also been a catalyst of transformative development for many entrepreneurs and organizations. Whether it’s been doubling down on ambitious ventures, pivoting to new focus areas or changing lanes altogether; people have reemerged with impressive strength. Let’s celebrate everyone who dares to dream and innovate in times of uncertainty.

Thank you all for participating today and showing your support for university startups and the changemakers of tomorrow. I hope you enjoy the show!
